Allison Akyuz

8277 Semiahmoo Drive, Blaine, WA• +1-604-841-1814 • apa53@cornell.edu

Education

CORNELL UNIVERSITY Ithaca, NY
Bachelor of Science in Biomedical Engineering Class of 2029
GPA: 3.78
Relevant coursework: Intro to BME, Biomolecular Thermodynamics, Statics & Mechanics

SOUTHRIDGE SCHOOL Surrey, BC
Honor Roll Class of 2025
Founder and President, Physics & Engineering Club
President, Science Club

Experience

RESEARCH INTERN La Ciotat, France
Olea Medical Summer of 2024
- Collaborated with PhD scientists on MRI and ultrasound technology research.
- Contributed to research on breast cancer imaging.
- Authored a literature review on neurological pathways for a company publication.

V&V ENGINEERING INTERN Vancouver, BC
Clarius Mobile Health Summer of 2023
- Assisted biomedical engineers working on handheld Bluetooth ultrasound devices.
- Tested application software and products, and recorded results.

Activities

INTEGRATIVE DESIGN, ENGINEERING WORLD HEALTH Fall of 2025 - Present
- Student-led project team focused on accessibility in global health.
- Collaborates with worldwide companies to design and construct low-cost medical devices for underserved countries and demographics.
- Skills Developed: Circuit design, multimeter/oscilloscope testing, prototyping with Fusion 360, cross-functional collaboration with international partner organizations, technical communication/poster presentation

Engineering Projects

INFRARED VEIN FINDER Spring of 2025
- Designed and built an infrared vein finder as an independent senior capstone project, researching difficult venous access to define requirements and modeling the full assembly in Fusion 360.
- Sourced components independently and produced a written research proposal and video documentation of the build.

ENERGY HARVESTING HEARING AID Fall of 2025 - Present
- Designed a magnetic energy harvesting pendulum for a low-cost, sustainable hearing aid as part of Engineering World Health at Cornell, targeting accessible hearing healthcare in underserved communities.
- Contributed to circuit design and testing for the energy harvesting system
- Recently presented findings at the ASEE St. Lawrence Research Poster Conference.
